Cohorts and biobanks
The University Medical Center Groningen is building the future of health

Extensive data collection and deeply phenotyped participants
- Demographics
- Clinical data
- Laboratory data
- Questionnaires
- Multiomics
- Imaging
- Functional tests
- Biosamples

We collaborate with local health care organisations and international research partners

We continue to expand as a core center for cohort and biobank collections

Longitudinal clinical and population cohorts of sufficient critical mass
- 13 cohorts
  - > 4,000 participants
- 29 cohorts
  - 1,000 - 4,000 participants
- 34 cohorts
  - 0 - 500 participants
- Total number of participants: 1.26 million
